Dear Valued Customer,

Subject: Continued Support for Select EOI Legacy Products

We are pleased to announce that **Onyx Spectrum Technology, Inc.** and **HGH USA** have entered into an agreement to provide continued support for select **Electro Optical Industries' legacy products**.

This agreement is intended to ensure that customers who have previously purchased EOI legacy products continue to have access to product support, repair, refurbishment, maintenance, manufacturing and related services.

Under the agreement, Onyx Spectrum Technology has obtained rights to support specific EOI legacy product lines, including:

- Blackbody sources
- Target simulators
- Projectors
- Collimators
- Related electro-optical and infrared test system components associated with these legacy products.

HGH USA will provide engineering and manufacturing support to Onyx during a defined transition period to help ensure continuity of service for existing customers.

This communication is specific to the EOI legacy products listed above. HGH USA remains committed to its ongoing business and product activities, and this agreement should not be interpreted as HGH exiting or discontinuing blackbody and related products.

For customers with EOI legacy equipment, Onyx Spectrum Technology will serve as a resource for long-term support, including manufacturing, repair, refurbishment, and maintenance services. The goal of this agreement is to provide a smooth transition and continued support for customers relying on these products in defense, aerospace, industrial imaging, transportation, and other mission-critical applications.

We value your continued trust and look forward to supporting your legacy EOI product needs.

For questions about product coverage, service requests, or transition support, please contact:

Onyx Spectrum Technology, Inc.
